

LUXURY FASHION RESALE DATABASE

23 JUN 2026

By: Paula Moreno Mappe

About Database

This dataset is inspired by the website <https://www.resee.com/en/>

What is RESEE?

ReSee is a Paris-based luxury pre-loved fashion resale platform, founded in 2013.

The company specialises in buying, authenticating, and reselling high-end designer pieces from iconic brands such as Chanel, Hermès, Celine, Louis Vuitton and Saint Laurent.

Unlike typical resale marketplaces, ReSee offers a full-service experience, where sellers simply submit their pre-loved items and ReSee handles everything: collection, professional photography, authentication, storage, and worldwide shipping to buyers in over 100 countries.

About Database

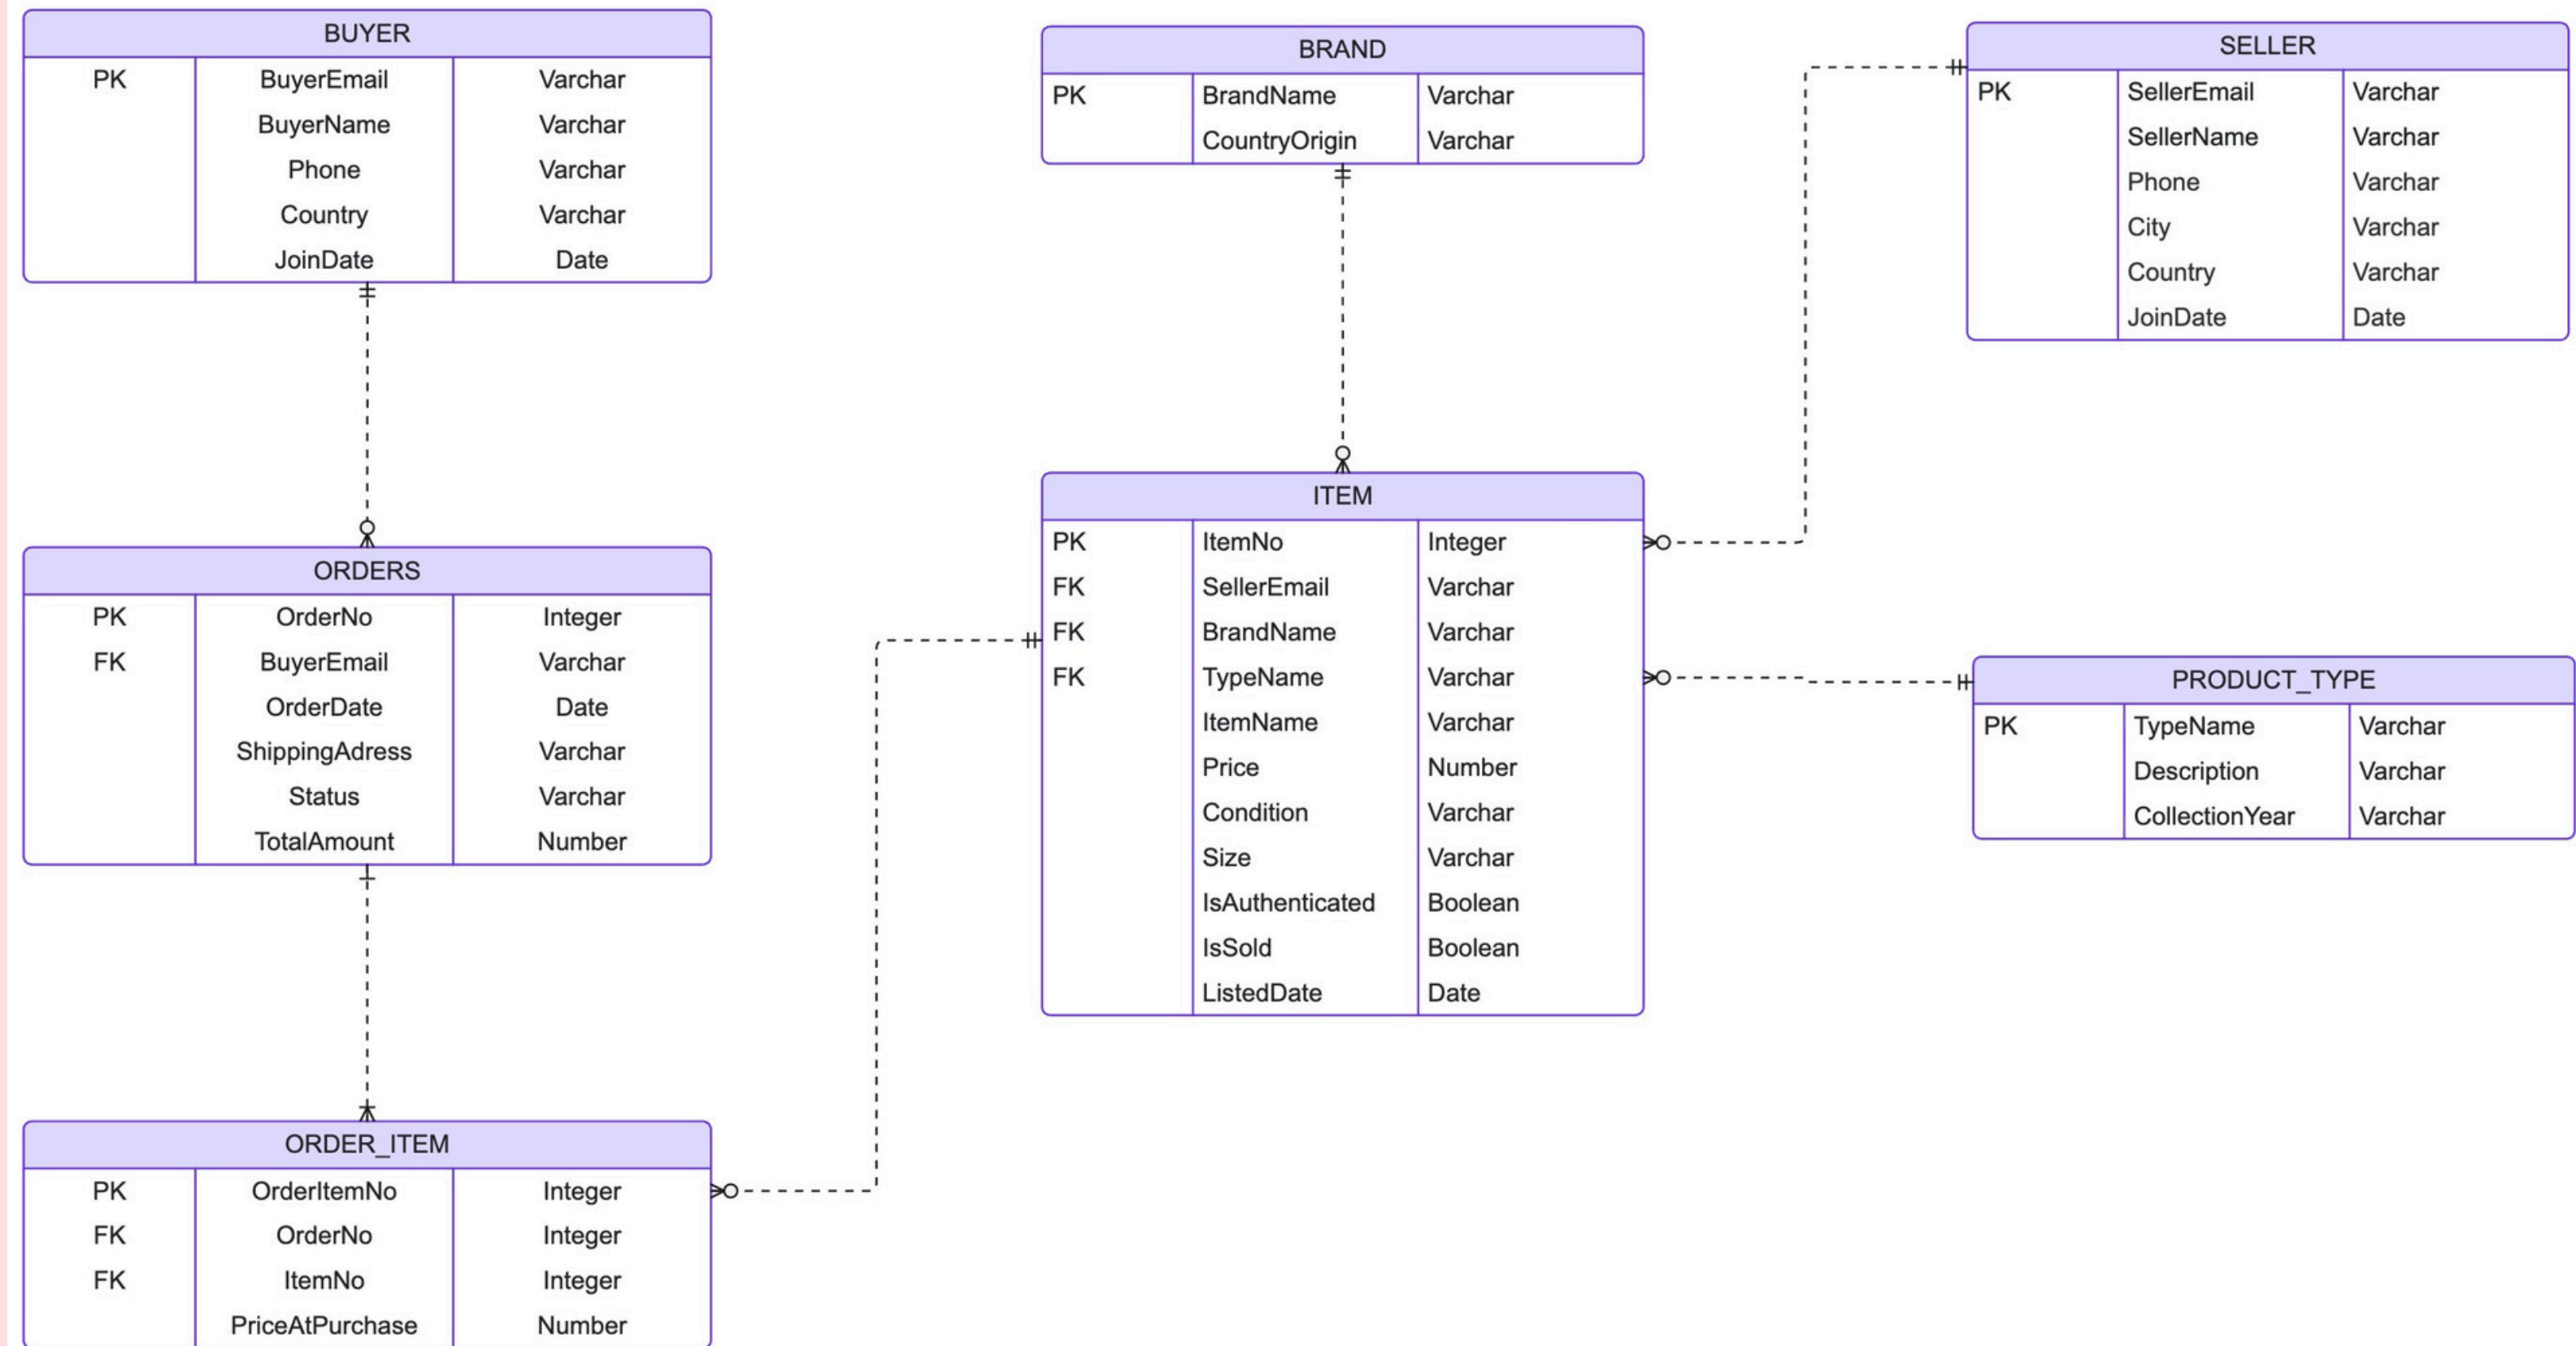

This database is a simplified model of how Luxury Fashion Resale platform works. It tracks:

- **Sellers** who submit their designer pieces
- **Buyers** who purchase authenticated items
- **Brands** and their country of origin
- **Product Types** to categorise items (Handbags, Clothing, Shoes, etc.)
- **Items** listed for sale with condition, price and authentication status
- **Orders** placed by buyers
- **Order Items** linking each order to the specific items purchased

RF
SEE

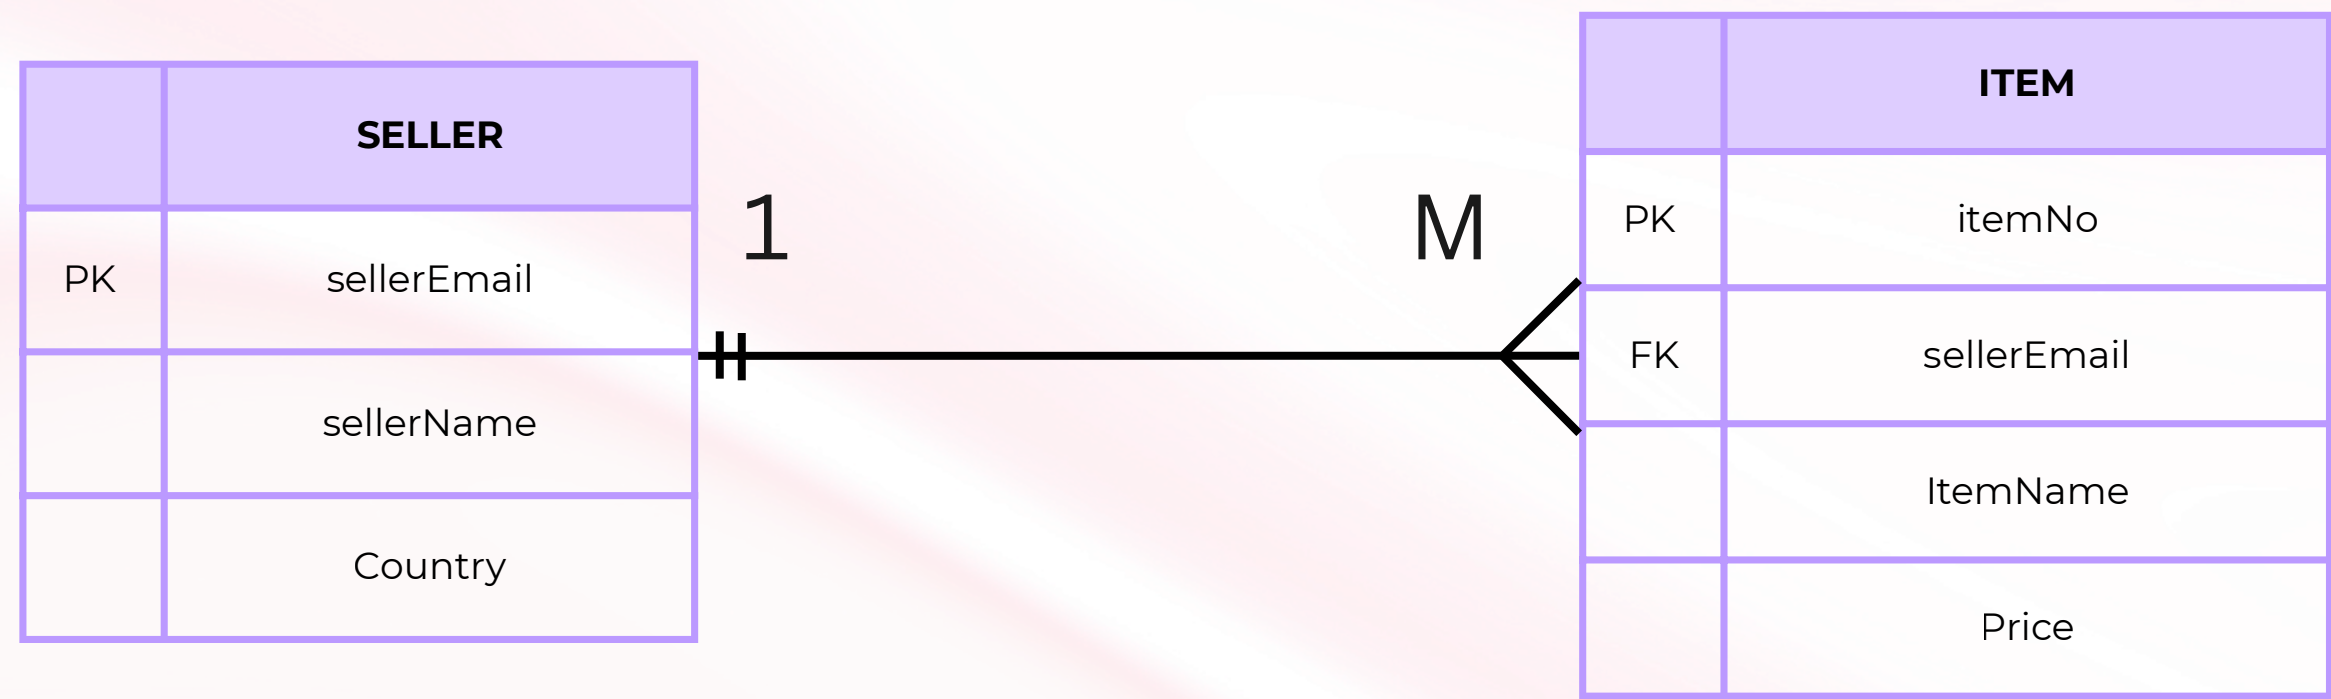

Entity Relationship Diagram (ERD)

One-to-Many Relationship: SELLER → ITEM

One seller can submit many items, but each item belongs to exactly one seller.

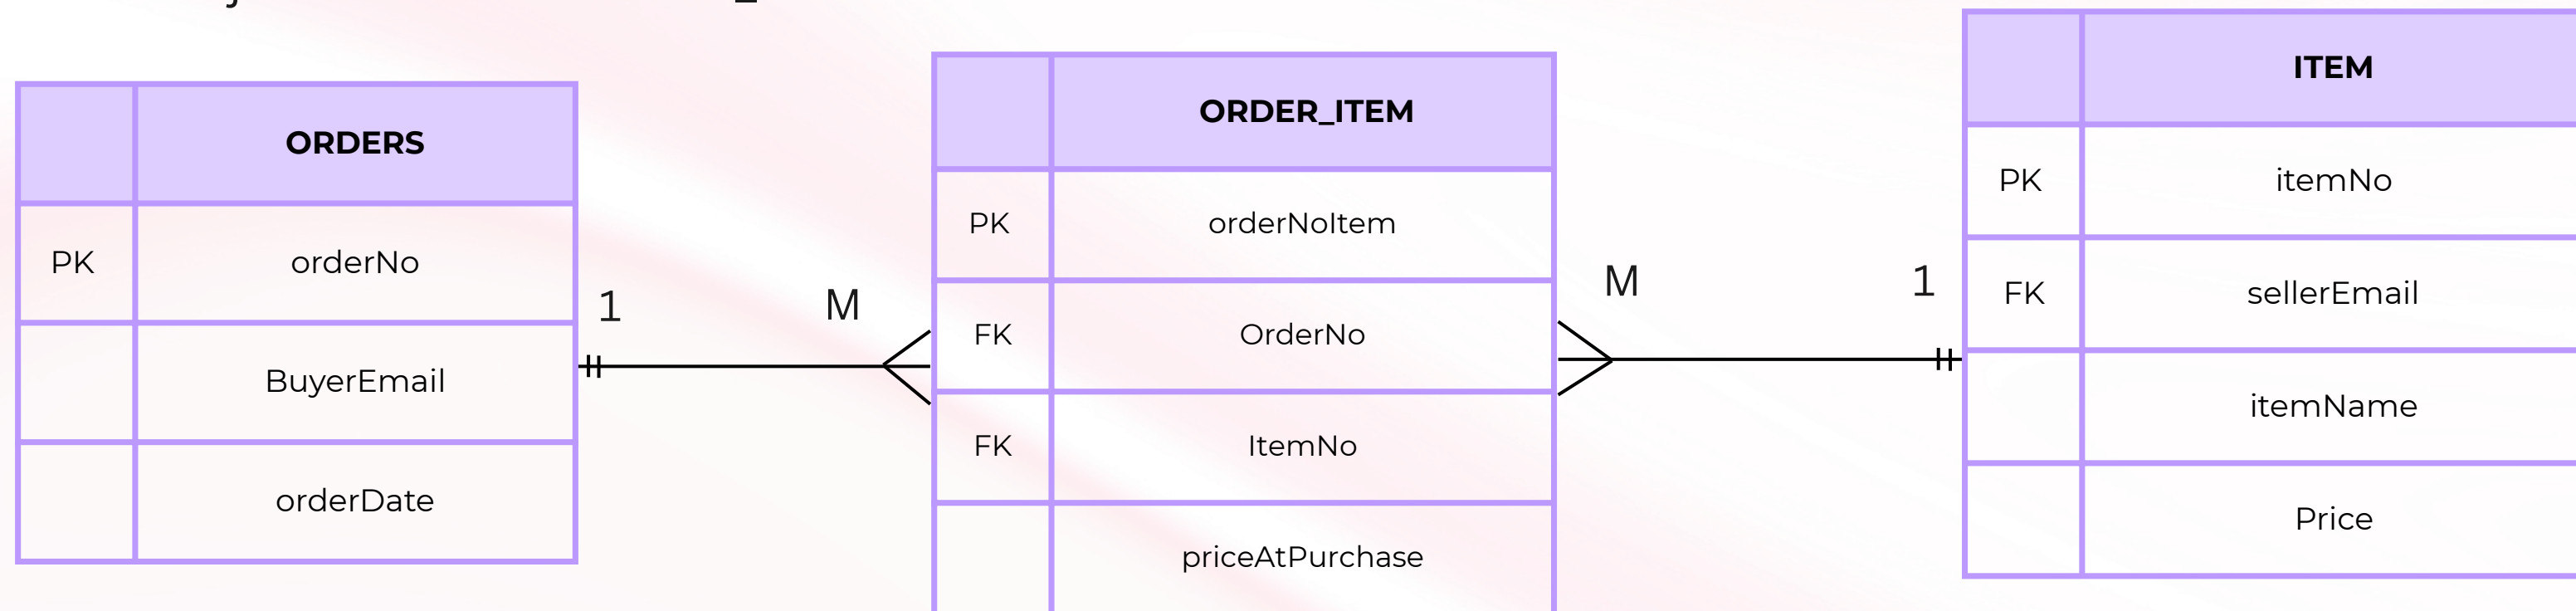

EXAMPLE: Anna Kowalski has 3 items, this demonstrates the one-to-many relationship, 1 seller can send many items..

sellerEmail	sellerName	Country
sofia.b@email.com	Sofia Bernard	France
anna.k@email.com	Anna Kowalski	UK

ItemNo	sellerEmail	itemName
1	sofia.b@email.com	Chanel Classic Flap Bag
2	anna.k@email.com	Hermes Silk Scarf
3	anna.k@email.com	Celine Luggage Tote
9	anna.k@email.com	Hermes Cape Cod Watch

Many-to-Many: ORDERS ↔ ITEM via ORDER_ITEM

An order can contain many items, and an item can appear in many orders. This is resolved by the junction table ORDER_ITEM.

EXAMPLE: Order 1004 contains 2 items (3 and 8). Item 3 could appear in other orders too, like order 1006. This is the many-to-many shown by ORDER_ITEM.

orderNo	buyerEmail
1004	yuki.m@email.com
1005	alice.t@email.com
1006	emma.b@email.com

orderno	itemNo	priceAtPurchase
1004	3	2800.00
1004	8	380.00
1005	4	1200.00
1006	3	2800.00

itemNo	itemName
3	Celine luggage tote
4	Balenciaga Blazer
8	Chanel CC Earrings

Query 1: Simple Single-Table Query

QUERY 1 : List the item name, brand, price and condition of all items that are authenticated and still available for sale, ordered by price from highest to lowest.

SQL Query	Query Output																																
<pre>SELECT itemName, brandName, price, condition FROM ReSee_Item WHERE isSold = 'N' AND isAuthenticated = 'Y' ORDER BY price DESC;</pre>	<table><tr><th>itemName</th><th>brandname</th><th>price</th><th>condition</th></tr><tr><td>Chanel Classic Flap Bag Black</td><td>Chanel</td><td>3500.00</td><td>Excellent</td></tr><tr><td>Celine Luggage Tote Phoebe Era</td><td>Celine</td><td>2800.00</td><td>Very Good</td></tr><tr><td>Prada Galleria Bag Black</td><td>Prada</td><td>1800.00</td><td>Excellent</td></tr><tr><td>Gucci Velvet Jacket Size 40</td><td>Gucci</td><td>1500.00</td><td>Very Good</td></tr><tr><td>Balenciaga Blazer Size 38</td><td>Balenciaga</td><td>1200.00</td><td>Good</td></tr><tr><td>Hermes Silk Scarf Les Chevaux</td><td>Hermes</td><td>450.00</td><td>Very Good</td></tr><tr><td>Chanel CC Pearl Earrings</td><td>Chanel</td><td>380.00</td><td>Excellent</td></tr></table> (7 rows)	itemName	brandname	price	condition	Chanel Classic Flap Bag Black	Chanel	3500.00	Excellent	Celine Luggage Tote Phoebe Era	Celine	2800.00	Very Good	Prada Galleria Bag Black	Prada	1800.00	Excellent	Gucci Velvet Jacket Size 40	Gucci	1500.00	Very Good	Balenciaga Blazer Size 38	Balenciaga	1200.00	Good	Hermes Silk Scarf Les Chevaux	Hermes	450.00	Very Good	Chanel CC Pearl Earrings	Chanel	380.00	Excellent
itemName	brandname	price	condition																														
Chanel Classic Flap Bag Black	Chanel	3500.00	Excellent																														
Celine Luggage Tote Phoebe Era	Celine	2800.00	Very Good

Chanel CC Pearl Earrings	Chanel	380.00	Excellent																														

Query 2: Natural Join

QUERY 2 : List item name, brand, price and seller name for all items from French brands, ordered by brand name.

SQL Query	Query Output																																
<pre>SELECT itemName, brandName, price, sellerName FROM ReSee_Item natural join ReSee_Seller natural join ReSee_Brand WHERE countryOrigin = 'France' ORDER BY brandName;</pre>	<table><tr><th>itemName</th><th>brandname</th><th>price</th><th>sellername</th></tr><tr><td>Celine Luggage Tote Phoebe Era</td><td>Celine</td><td>2800.00</td><td>Anna Kowalski</td></tr><tr><td>Chanel Classic Flap Bag Black</td><td>Chanel</td><td>3500.00</td><td>Sofia Bernard</td></tr><tr><td>Chanel CC Pearl Earrings</td><td>Chanel</td><td>380.00</td><td>Sofia Bernard</td></tr><tr><td>Hermes Cape Cod Watch</td><td>Hermes</td><td>2200.00</td><td>Anna Kowalski</td></tr><tr><td>Hermes Silk Scarf Les Chevaux</td><td>Hermes</td><td>450.00</td><td>Anna Kowalski</td></tr><tr><td>Louis Vuitton Speedy 30</td><td>Louis Vuitton</td><td>1100.00</td><td>Priya Sharma</td></tr><tr><td>Saint Laurent Sandals Size 37</td><td>Saint Laurent</td><td>750.00</td><td>Giulia Rossi</td></tr></table> (7 rows)	itemName	brandname	price	sellername	Celine Luggage Tote Phoebe Era	Celine	2800.00	Anna Kowalski	Chanel Classic Flap Bag Black	Chanel	3500.00	Sofia Bernard	Chanel CC Pearl Earrings	Chanel	380.00	Sofia Bernard	Hermes Cape Cod Watch	Hermes	2200.00	Anna Kowalski	Hermes Silk Scarf Les Chevaux	Hermes	450.00	Anna Kowalski	Louis Vuitton Speedy 30	Louis Vuitton	1100.00	Priya Sharma	Saint Laurent Sandals Size 37	Saint Laurent	750.00	Giulia Rossi
itemName	brandname	price	sellername																														
Celine Luggage Tote Phoebe Era	Celine	2800.00	Anna Kowalski																														
Chanel Classic Flap Bag Black	Chanel	3500.00	Sofia Bernard

Louis Vuitton Speedy 30	Louis Vuitton	1100.00	Priya Sharma																														
Saint Laurent Sandals Size 37	Saint Laurent	750.00	Giulia Rossi																														

Query 3: Cross Product (equivalent to Query 2)

QUERY 3 : This re-expresses Query 2 using cross product notation instead of natural join.

SQL Query	Query Output																																
<pre>SELECT i.itemName, i.brandName, i.price, s.sellerName FROM ReSee_Item i, ReSee_Seller s, ReSee_Brand b WHERE i.sellerEmail = s.sellerEmail AND i.brandName = b.brandName AND b.countryOrigin = 'France' ORDER BY i.brandName;</pre>	<table><tr><th>itemname</th><th>brandname</th><th>price</th><th>sellername</th></tr><tr><td>Celine Luggage Tote Phoebe Era</td><td>Celine</td><td>2800.00</td><td>Anna Kowalski</td></tr><tr><td>Chanel Classic Flap Bag Black</td><td>Chanel</td><td>3500.00</td><td>Sofia Bernard</td></tr><tr><td>Chanel CC Pearl Earrings</td><td>Chanel</td><td>380.00</td><td>Sofia Bernard</td></tr><tr><td>Hermes Cape Cod Watch</td><td>Hermes</td><td>2200.00</td><td>Anna Kowalski</td></tr><tr><td>Hermes Silk Scarf Les Chevaux</td><td>Hermes</td><td>450.00</td><td>Anna Kowalski</td></tr><tr><td>Louis Vuitton Speedy 30</td><td>Louis Vuitton</td><td>1100.00</td><td>Priya Sharma</td></tr><tr><td>Saint Laurent Sandals Size 37</td><td>Saint Laurent</td><td>750.00</td><td>Giulia Rossi</td></tr></table> (7 rows)	itemname	brandname	price	sellername	Celine Luggage Tote Phoebe Era	Celine	2800.00	Anna Kowalski	Chanel Classic Flap Bag Black	Chanel	3500.00	Sofia Bernard	Chanel CC Pearl Earrings	Chanel	380.00	Sofia Bernard	Hermes Cape Cod Watch	Hermes	2200.00	Anna Kowalski	Hermes Silk Scarf Les Chevaux	Hermes	450.00	Anna Kowalski	Louis Vuitton Speedy 30	Louis Vuitton	1100.00	Priya Sharma	Saint Laurent Sandals Size 37	Saint Laurent	750.00	Giulia Rossi
itemname	brandname	price	sellername																														
Celine Luggage Tote Phoebe Era	Celine	2800.00	Anna Kowalski																														
Chanel Classic Flap Bag Black	Chanel	3500.00	Sofia Bernard																														
Chanel CC Pearl Earrings	Chanel	380.00	Sofia Bernard																														
Hermes Cape Cod Watch	Hermes	2200.00	Anna Kowalski																														
Hermes Silk Scarf Les Chevaux	Hermes	450.00	Anna Kowalski																														
Louis Vuitton Speedy 30	Louis Vuitton	1100.00	Priya Sharma																														
Saint Laurent Sandals Size 37	Saint Laurent	750.00	Giulia Rossi																														

Query 4: Group By with Having

QUERY 4 : List each brand and the total number of items it has listed. Only show brands that have more than one item listed, ordered by total items from highest to lowest.

SQL Query	Query Output						
<pre>SELECT brandName, COUNT(*) AS total_items FROM ReSee_Item GROUP BY brandName HAVING COUNT(*) > 1 ORDER BY total_items DESC;</pre>	<table><thead><tr><th>brandname</th><th>total_items</th></tr></thead><tbody><tr><td>Hermes</td><td>2</td></tr><tr><td>Chanel</td><td>2</td></tr></tbody></table> (2 rows)	brandname	total_items	Hermes	2	Chanel	2
brandname	total_items						
Hermes	2						
Chanel	2						

Query 5: Subquery

QUERY 5 : List the name, brand and price of the most expensive item currently available for sale.

SQL Query	Query Output						
<pre>SELECT itemName, brandName, price FROM ReSee_Item WHERE price = (SELECT MAX(price) FROM ReSee_Item WHERE isSold = 'N');</pre>	<table><tr><th>itemname</th><th>brandname</th><th>price</th></tr><tr><td>Chanel Classic Flap Bag Black</td><td>Chanel</td><td>3500.00</td></tr></table> (1 row)	itemname	brandname	price	Chanel Classic Flap Bag Black	Chanel	3500.00
itemname	brandname	price					
Chanel Classic Flap Bag Black	Chanel	3500.00					

Query 6: Self Join (Cross Product)

QUERY 6 : Find all orders that contain more than one item by joining ORDER_ITEM with itself. Uses aliases oi1 and oi2.

SQL Query	Query Output
<pre>SELECT oi1.orderNo, oi1.itemNo AS first_item, oi2.itemNo AS second_item FROM ReSee_Order_Item oi1, ReSee_Order_Item oi2 WHERE oi1.orderNo= oi2.orderNo AND oi1.itemNo < oi2.itemNo ORDER BY oi1.orderNo;</pre>	<pre>orderno first_item second_item -----+-----+----- 1004 3 8 (1 row)</pre>

Domain Integrity — CHECK Constraints

CHECK constraints enforce that only valid data can be inserted into the database.

1

ReSee_Item —di_item_condition

```
CONSTRAINT di_item_condition CHECK (condition IN  
(  
'Excellent', 'Very Good', 'Good', 'Fair'  
))
```

Only 4 valid condition values accepted. Any other value (example: 'Average') will be rejected.

2

ReSee_Order_Table —di_order_status

```
CONSTRAINT di_order_status CHECK (status IN (  
'Pending', 'Confirmed', 'Shipped',  
'Delivered', 'Cancelled'))
```

Order status must be one of 5 valid values, matching the real ReSee workflow.

3

ReSee_Item —di_item_price

```
CONSTRAINT di_item_price CHECK (price > 0)
```

Price must be a positive number. A price of 0 or negative is not allowed.

4

Physical Causes

```
CONSTRAINT di_seller_joinedDate CHECK  
(joinedDate >= '2013-01-01')
```

Join date cannot be before 2013 — the year ReSee was founded.

Referential Integrity — ON DELETE Actions

ON DELETE RESTRICT

What it means:

If you try to delete a parent record that has child records, PostgreSQL will BLOCK the deletion and return an error.

Example in the database:

```
-- Delete seller Anna Kowalski
DELETE FROM ReSee_Seller
WHERE sellerEmail = 'anna.k@email.com';
```

Result:

```
ERROR:  update or delete on table "resee_seller" violate
s foreign key constraint "resee_itemfk_seller" on table
"resee_item"
DETAIL:  Key (selleremail)=(anna.k@email.com) is still r
eferenced from table "resee_item".
```

Anna has 3 items in ITEM — she cannot be deleted until those items are removed first.

ON DELETE CASCADE

What it means:

If you delete a parent record, PostgreSQL will AUTOMATICALLY delete all child records too, no error, the deletion cascades down.

Example in the database:

```
-- Delete order 1004
DELETE FROM ReSee_Orders
WHERE orderNo = 1004;
```

Result:

```
postgres=# -- Delete order 1004
DELETE FROM ReSee_Orders
WHERE orderNo = 1004;
DELETE 1
```

Deleting order 1004 automatically removes its two rows in ORDER_ITEM (items 3 and 8).

Database View — AvailableItems

A VIEW is a saved query that acts like a virtual table. Users can query it directly without writing the full SQL each time.

SQL Query	Query Output
<pre>CREATE VIEW AvailableItems AS SELECT itemNo, itemName, brandName, typeName, price, condition FROM ReSee_Item WHERE isSold = 'N' AND isAuthenticated = 'Y';</pre> How to use the VIEW <pre>SELECT * FROM AvailableItems;</pre>	<pre>postgres=# SELECT * FROM AvailableItems; itemno itemname brandname typename price condition -----+-----+-----+-----+-----+----- 1 Chanel Classic Flap Bag Black Chanel Handbag 3500.00 Excellent 2 Hermes Silk Scarf Les Chevaux Hermes Scarf 450.00 Very Good 3 Celine Luggage Tote Phoebe Era Celine Handbag 2800.00 Very Good 4 Balenciaga Blazer Size 38 Balenciaga Clothing 1200.00 Good 7 Prada Galleria Bag Black Prada Handbag 1800.00 Excellent 8 Chanel CC Pearl Earrings Chanel Jewellery 380.00 Excellent 10 Gucci Velvet Jacket Size 40 Gucci Clothing 1500.00 Very Good (7 rows)</pre>

Why use a view?

Simplifies queries, users don't need to remember the WHERE conditions every time.

THANK YOU FOR YOUR ATTENTION
